## Summary

I am a self-motivated professional passionate about quality control. I bring to this position a hands-on approach in the testing of software systems. I have a solid understanding of QA methodologies used in the industry and the Software Development Life Cycle (SDLC). My areas of expertise extend to cover Test Plans and Test Cases Development, Configuration, and Troubleshooting.

## Experience

### ITSOLERA

August 2022 – October 2022

INTERNEE (QA Analyst)

Islamabad

- **Executed** thorough manual testing on different websites, identifying and reporting **critical bugs** that improved software quality.
- **Authored and documented** more than **100 detailed test cases** based on functional requirements and user stories, ensuring Test coverage and alignment with project goals.
- **Monitored and tracked** defects using industry-standard bug tracking tools, successfully resolving of reported issues through close collaboration with the development team.
- **Facilitated** cross-functional team meetings with developers and project managers, leading to **improvement** in alignment on quality objectives and project timelines.

### Remote

January 2024 - March 2024

Quality Assurance Analyst

- **Remote Software Testing:** Performed comprehensive manual testing of web applications, ensuring functionality, usability, and security across various devices and browsers.
- **Test Plan Development:** Collaborated with clients to understand project requirements and developed detailed test plans and test cases, tailored to meet specific project needs.
- **Test Documentation:** Prepared comprehensive test reports, summarizing the testing process, findings, and recommendations for future improvements.
- **Key Skills Developed:** Remote Collaboration, Test Plan Development, Bug Reporting, Regression Testing, Client Communication, Documentation.

## Personal Projects

- **Website Testing Automation:** Create automated test scripts for a simple website using Selenium. Focus on testing basic functionalities like form submissions, navigation, and UI elements
- **Bug Tracking System:** Build a basic bug tracking system using a Jira. Document and manage bugs, track their status, and generate simple reports.
- **Manual Testing of a Web Application:** Conduct manual testing for a small web application, documenting test cases, execution results, and issues found. Provide a detailed report with suggestions for improvements.
- **Regression Testing Suite:** Create a regression test suite for a small software application, ensuring that new changes don't break existing functionality. Include test cases for critical features.

## Education

Comsats University Wah Campus

Feb 2019 – Jan 2023

Bachelors in Computer Science

WAHCANTT

## Skills

Manual Testing, Automation Testing, Python, Scraping, BeautifulSoup, Selenium

## Certification

Software Testing Master class
